Memoranda

R. S. Crossin
Howland Island
14 - Aug 1966

NO ADP
CPT
8/16/68

14 Aug.

arrived island 2000.

Banded 1250 Stand. Royal
streaming behind me,
also Balmer for half of
the time. Many of
the Sooties are just laying
fresh eggs, many newly
hatched 1-2 day old chicks
and a great abundance of
large, nearly full grown
chicks. Adult are
spooky and landing
is absolutely pandemonium
full dads of the moon.
Juvenile birds were
not nearly as spooky.
